The company's commitment to providing the best quality services, superior order execution, and dedicated support sets it apart from its competitors.

Are you constantly searching for opportunities but feeling uncertain?

WHICH IS THE RIGHT PATH TO EARN MONEY?

FOREX

Forex, also known as foreign exchange or FX, is the largest and most liquid financial market in the world. It is a decentralized global market where all the world's currencies trade.

www.thestronghold.live

What is FOREX?

Forex (FX) is a portmanteau of the words foreign [currency] and exchange. Foreign exchange is the process of changing one currency into another for various reasons, usually for commerce, trading, or tourism.

- **The largest financial market in the world. Over \$US 4 Trillion Daily Turnover.**
- **Forex market has no physical location and no central exchange (off-exchange).**
- **Forex market operates 24-hour.**

The Forex Charts offer over **6000 graphs** in real-time with **Forex Interbank rates, Cryptocurrencies, Commodities, Equity Indices and US stocks**. 27 time frames including tick charts and flexible line tools. It also presents a vast range of technical indicators (over 70) as Linear Regression, CCI, ADX and many more. You can detach the graph and see it full screen. **Make the most of our chart.**

What is FOREX TRADING?

Forex trading, also known as foreign exchange trading, refers to the buying and selling of currencies on the global market. It is the largest and most liquid financial market worldwide, with a daily trading volume of trillions of dollars.

FX trading aims to profit from fluctuations in exchange rates between different currencies. Traders speculate on the future movement of currency pairs, attempting to buy low and sell high to make a profit.

For example, if you're interested in investing in the renewable energy sector in India, you could use a stock screener to find companies with a market capitalization above a certain threshold, thereby eliminating smaller, potentially riskier options.

What is **CRYPTOCURRENCY?**

Cryptocurrency is a digital payment system that doesn't rely on banks to verify transactions. It's a peer-to-peer system that can enable anyone anywhere to send and receive payments. Instead of being physical money carried around and exchanged in the real world, cryptocurrency payments exist purely as digital entries to an online database describing specific transactions. When you transfer cryptocurrency funds, the transactions are recorded in a public ledger. Cryptocurrency is stored in digital wallets.

Cryptocurrency received its name because it uses encryption to verify transactions. This means advanced coding is involved in storing and transmitting cryptocurrency data between wallets and to public ledgers. The aim of encryption is to provide security and safety.

BITCOIN

'The first cryptocurrency was Bitcoin, which was founded in 2009 and remains the best known today. Much of the interest in cryptocurrencies is to trade for profit, with speculators at times driving prices skyward.'
